TIKIGAQ ENGINEERING SERVICES

## Mission

*The mission of Tikigaq Engineering is to provide high quality, creative technical solutions by maintaining a focus on the one true measure of quality: The needs of our clients.*

Tikigaq: (Tik-i-uk) n.  
Inupiaq word for  
Point Hope

## Work Philosophy

Tikigaq Engineering Services LLC is a division of Tikigaq Corporation; an Alaska Native owned and operated company. We provide engineering solutions that are based on dedicated efforts to identify the true needs of our clients.

Whether a small, complex, or a large program requiring many projects and work elements, the key to a successful project is a thorough understanding of the requirements and focused attention to satisfying those needs. By instituting a product delivery process with delineated requirements, resources, goals, methods, processes and deliverables, we match the complexity of the task. We then identify the necessary resources and choose team members with the capabilities to address the client's needs.

Tikigaq's Quality Program is embedded in our work activities, and in meeting and exceeding the client's needs. Our board of Directors is committed to providing

high value, quality services to our clients. To ensure that we maintain the quality of depth and capabilities required by our clients and our board, Tikigaq has partnered with world-class firms that are known for a high level of service and quality, and can provide access to those resources through existing agreements.

In addition to Tikigaq engineers, designers and excellent mentors available through our partnerships, Tikigaq Corporation subsidiaries also provide access to environmental professionals, experienced construction and project management personnel, and communications and computer services personnel.

**We provide engineering solutions that are based on dedicated efforts to identify the true needs of our clients.**
